

1. The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.
2. Indiana's Telephone Privacy law has improved our time at home by stopping the incessant calls we receive at dinner time - our family time in the evening is essential to our families well being. As the mom, I insist that we all eat dinner at the table - no tv, no phones - just us, eating, talking and being together.
3. You may wonder how effective Indiana's law has been. I used to receive 4-5 calls during dinner prep and eating each night, now I might receive one.
4. Please don't allow anything that lessens the impact that the current law gives our family to be passed.
